## Professional Achievements

---

Programming passionately since 1988, David opened his own development studio in Central Georgia a decade later. From 1998-2001 he built his business around the country and, in January of 2001, incorporated in the State of Georgia. As the web development industry continued to grow out of its infancy, David began to apply his skills and experience to startups that were advancing the state of the industry, leading teams in Georgia, Hawaii, Virginia, New York, California, Florida, and Arizona. David's work continues to sharpen the cutting edge of what is possible on the web, and has been validated with awards, industry certifications, and media attention from the likes of Reader's Digest and PC Magazine.

David lives in Denver, Colorado with his wife Ekaterina and their son Solomon. He enjoys hiking in the mountains, connecting with other developers at local meet-ups, and quiet evenings at home with his family. He is actively involved in the development industry, mentoring other programmers and giving presentations at various tech gatherings related to the technologies he enjoys.
